PROFESSIONAL SUMMARY

AI engineering and Full-stack student building production-ready applications with robust web architecture and practical problem-solving skills. Skilled in designing reliable backend systems, creating intelligent workflows, and developing user-centric applications for real-world scenarios. Open-source contributor to Rocket.Chat and Zulip. Strong coding aptitude demonstrated by solving 460+ challenges and maintaining a LeetCode contest rating of 1950+, along with notable hackathon achievements.

EDUCATION

Bachelor of Technology (Data Science)

2024 - 2028

Newton School of Technology, Rishihood University

Grade: 8.0/10.0

Intermediate (Class XII)

2022 - 2023

NRJ Sr Sec School

Grade: 79.4%

PROJECTS

MoneyMind ([Github](#)) ([Demo](#))

November 2025

- Managing personal finances can be overwhelming when data is scattered across accounts and spreadsheets, so I developed MoneyMind to provide a unified solution for tracking income, expenses, and planning budgets, giving users control.
- Developed a full-stack solution with a React frontend for dynamic interfaces and a Node.js, Express, and Prisma backend connected to PostgreSQL, implementing JWT authentication, building APIs, and incorporating charts to visualize data.
- Integrated Gemini AI into the platform to automatically analyze transactions, provide insights, suggest optimized financial decisions, and encourage consistent habits, helping users make smarter choices while maintaining budgeting discipline.

AlgoAnalyze AI ([Github](#)) ([Demo](#))

September 2025

- Many students often struggle to understand how algorithms function internally, which makes practicing coding confusing, less interactive, harder to grasp deeply, resulting in slower learning and difficulty in applying concepts.
- Built AlgoAnalyze AI with a React frontend, Node.js backend, Monaco Editor integration, and Gemini AI for dry runs, interactive visualizations, bug detection, coding tools, providing users a complete environment for algorithm exploration.
- Enabled users to learn coding concepts step-by-step with execution, explanations, guided walkthroughs, and AI-powered insights from Gemini AI, while providing interview tools to strengthen problem-solving and confidence in assessments.

CERTIFICATIONS

Hashtech Festival - Tekron 2025 Newton School of Technology ([Link](#))

January 2026

It reflects participation in coding challenges, demonstrating problem-solving and algorithmic skills in competitive.

Full stack generative and Agentic AI with python Udemy ([Link](#))

November 2025

Hands-on experience in Generative and Agentic AI using Python, RAG, multi-agent systems, Docker, and GitHub.

SKILLS

Computer Language: Python, TypeScript, JavaScript, SQL

Courses: Data Structure

Databases & Data Tools: NoSQL, PostgreSQL, MySQL, MongoDB, Tableau

AI / ML: Machine Learning, GenAI, LangGraph, MCP, Natural Language Toolkit (NLTK), n8n Introduction, RAG, Scikit-learn, TensorFlow, PyTorch, Deep Learning (DL), Generative AI

APIs & Testing: API, OAuth 2.0

Cloud & DevOps: AWS, Git and Github, Docker, Docker Compose, Google Cloud Platform, Azure

Frameworks & Libraries: NumPy, Pandas, Next.js, Prisma ORM, React, Node.js, AngularJS, Django, FastAPI

EXTRA-CURRICULAR ACTIVITIES

- [Link](#) Participated in a competitive Agentic AI hackathon at the AI Impact Summit 2026, where our team developed a scam detection platform and secured Rank 8 in India, demonstrating advanced AI problem-solving skills.
- Open-Source Contributor – enhanced features and fixed issues, elevating code quality through peer collaboration.
